## **Measurement Instructions for Replacement Windows**

This sheet will make it easy for you to save your valuable time and money, and not to mention, added stress. Our windows are manufactured locally and are energy efficient, fit to your size, as well as easy to install which saves frustration.

Please follow these instructions and refer to the diagrams for easy measuring. Take the time to be accurate, and in no time you will be on your way to your new windows. Simply fill out the chart below, and bring it in to one of our three building centers, where our staff will be happy to help you with the order.

## Width

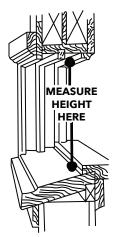

Measure the width of the opening from jamb to jamb, behind the trim or stops. Measure in three places: at the top, bottom and middle and then use the smallest dimension.

## Height

Measure the height from the highest point on the sloped sill to the head jamb about the trim. Measure in three places: each side and middle, and then use the smallest dimension.

Room	Window Type	Width	Height	Quantity
